Department of Telecommunications and Energy
Fitchburg Gas and Electric Light Company
Docket No. D.T.E. 02-24/25
Record Request Response

Record Request No.: AG-RR-13

Provide the names of companies that FG&E uses for salvage purposes of its retired equipment in general, and specifically including the materials booked to Account 362.

Response:

The Company has supplied me with the following information. FG&E has been using William H. Reisner Inc., Clinton, MA for the salvage of all metal scrap, including, but not limited to copper wire and street light fixtures, that have no remaining useful life.

In 1997, FG&E removed a portion of a Substation on Wallace Road, Fitchburg (Account 362). Coastal Energy Incorporated was hired to remove the asbestos, steel structures and the foundation. Coastal Energy salvaged the steel from the structures.

There has been no salvage from the retirement of gas plant.

Person Responsible: James H. Aikman
